0.0.1 Lab 5: Data Visualization

Misc Info

- Don't forget to put comments in your code!
- Don't forget units in your code!

1 MatPlotLib

MatPlotLib is a plotting tool that can be downloaded to work with Python.

When using Matplotlib, we tend to use the code: import matplotlib as plt.pyplot.

Below are some usual functions for this.

plt.plot(a, b) plt.xlabel(""") plt.ylabel(""") plt.title("") plt.show()

plt.hist() plt.pie() plt.bar()

```
